PIXERS
FOR
HOSTELS

<http://www.pixers.eu>

Who we are

PIXERS is a “functional art” shop where you can buy wide range of things for your wall. We sell unique **wallpapers**, **canvases**, **posters** and **stickers** with patterns based on a gallery of more than 10 million of great photos and graphics. You can also use your own photo and put it on your wall!

All our products are fabricated only for a special wish. We use the latest technologies of safe and ecologic **latex print**, as well as the best print media. **PIXERS'** products are unbeatable against other products available on the market because of the exceptional design, special endurance and intensity of colors which lasts for long years.

What we offer you

The letter "S" in the word **HOSTEL** is an equivalent for:

- Special
- Sparking
- Stunning
- Specific
- Selected ...

The **HOSTEL** is **not** a **HOTEL** and this is the feature we can exploit!

HOSTEL - a place for young people travelling around the world who stay there only for a while... And this time shall be **Something Super-Spicy Special!** Do you think that make the place friendly and extravagant at the same time is something hard to do? Woah! Nothing further from the truth!

To make your hostel a place where people come because of great atmosphere and striking design is nothing complicated. OK, let's say it IS complicated, but with **PIXERS** it's just a pushover :)

How do you want your HOSTEL to look like:

...boring?

...or maybe just fantastic?!

PIXERS + HOSTEL ...and what now?

PIXERS will make your **HOSTEL special**. You can create on the walls whatever you want. Beginning with landscapes of the neighbourhood, ending with colorful graphics and abstractions.

People coming to you will admire the **unique design** of the interiors, will make **photos** of the walls, which then will be sent to their friends spreading the idea of **PIXERS design** and making a commercial of your special **HOSTEL**.

If you are interested in collaboration with **PIXERS**, we can offer you some great [discounts and benefits](#)! You can see all our projects on:
